

## Industrial Research

An engineer  
an advance  
industrial  
innovative  
significant  
to experiment  
to foresee  
to tamper with

a scientist  
a breakthrough  
piracy  
efficient  
hazardous  
to carry out  
to improve

a thinktank/progress  
a patent  
brain-drain  
reliable  
to search for  
an experiment  
to devise

## And now a bit of conversation

Woman: Would you be ready to take part in this experiment?

Man: Cloning human beings might have unexpected consequences.

Woman: I just can't work it out.

Man: Our research is more advanced today, but other labs are catching up with us.

Woman: This is really a chicken and egg problem.
