to cough	to throw up	to faint
to look after someone	to x-ray	to have a scan
to have an operation	to have a rest	to recover
to heal		

And now a bit of conversation

Woman: He couldn't go out last night; he had a splitting headache.

Man: Did you have a flu vaccine this autumn?

Woman: Quick smoking and go on a diet. You'll feel better.

Man: I don't know whether I should have an x-ray or an MRI. What I know is that I don't want to be operated upon.

Woman: They gave me an epidural when I was giving birth. I was so glad I was anesthetized.

Man: Brian said he felt ill, so I made an appointment with the doctor.

Woman: I'm glad to see your up and about again.
