

The Past / The Present / The Future

The past	BC/Before Christ	AD/Anno Domini
an event	the current month	the current year
in the near future	next time	in the long run
the deadline	fait	short lived
brief	momentary	
provisional/temporary	endless	daily
up to date	current	old fashioned
out of date/out dated	In those days	formerly
lately	recently	from then on
currently	these days	nowadays
in this day	and age	from now on
soon	sooner or later	now and then
from time to time	for ages	to go on
to keep on doing something	to last	to expected
to anticipate	to look forward to	to postpone
to be on schedule		

And now a bit of conversation

Woman:	Let bygones be bygones.
Man:	That's when he said it's now or never.
Woman:	In present day Ireland things are completely different.
Man:	The outlook for them is rather lousy.
Woman:	I'm afraid it's too good to last.
Man:	Stay focused, your future is at state.
Woman:	We don't know what the future holds or has in store for us.
