

The Day and the Night

At day break
a sunset
all through the day
last night
tomorrow morning
the day before yesterday

at dawn
dusk/twilight
tonight
night by night
the morning before

the sunrise
at nightfall
all day long
all night long
yesterday afternoon

And now a bit of conversation

Woman: He got home in the early small hours of the morning.

Man: Don't worry, I'll get first thing in the morning.

Woman: I usually take a nap in the afternoon.

Man: We celebrated far into the night.
